

AccuBridge for LDAP Provisioning

AccuBridge™ for LDAP Provisioning streamlines the centralized management of SCM security, allowing you to combine the power of AccuRev® process change management with existing software infrastructure and directory server investments in your enterprise IT environment. AccuBridge for LDAP Provisioning lowers SCM administration costs even as it automates the administration of your corporate security policies, processes, and procedures. The solution offers the peace of mind of centralized security administration with the ease of use of an out-of-the-box integration with OpenLDAP, Microsoft Active Directory, and many other industry-standard LDAP directory servers.

The Power of AccuRev

AccuRev provides enterprise software configuration management (SCM) and architecturally enabled process model optimization for highly distributed application development. AccuRev's award-winning SCM architecture has been designed specifically to simplify complex parallel development projects, ensuring optimal team collaboration, outsourcing models, software asset reuse, and time to market that far exceeds the capabilities of legacy SCM tools.

AccuRev forms the core of a true best-of-breed, multi-vendor application lifecycle management (ALM) solution, with unique capabilities which enhance and extend complementary development tools. This provides you with maximum control by offering the flexibility to choose the best lifecycle tool for your unique requirements, versus being locked in to a tool offered by a single-vendor suite. The result is an ideal mix of productivity with traceability and auditing for distributed and parallel projects and teams of all sizes.

AccuBridge for LDAP Provisioning

AccuBridge for LDAP Provisioning empowers the manageability of your development teams, tool security, and access control, so that your centralized user administration via directory services, such as LDAP directory servers and Microsoft Active Directory, can provision user and group permissions from a centralized or corporate repository.

AccuBridge provides your corporate directory administrators with a complete user management toolkit that supports secure management of AccuRev provisioning, and the addition and removal of users and groups synchronized with change in your corporate directories. Besides central administration, AccuBridge for LDAP Provisioning enhances your security and auditing processes, and replaces manual provisioning with enterprise-ready automation.
