

JetBrains IntelliJ IDEA Plug-in for AccuRev

The JetBrains IntelliJ® IDEA Plug-in for AccuRev provides developers and release engineers with an out-of-the-box robust integration between AccuRev software change and configuration management (SCCM) and the industry-leading JetBrains IntelliJ IDEA IDE. Combining JetBrains IntelliJ IDEA with the power of AccuRev in a single integrated development environment increases the agility, reliability, and quality of your distributed, parallel and Agile software development process.

Integrate AccuRev SCM and Issue Tracking inside JetBrains IntelliJ IDEA

The JetBrains IntelliJ IDEA Plug-in for AccuRev focuses on developer usability and developer productivity within the JetBrains IntelliJ IDEA environment. The integration provides developers with a full palette of AccuRev functionality without having to leave the familiar JetBrains IntelliJ IDEA environment. IntelliJ developers gain a transparent, stable, and highly functional SCM capability with stream-based process automation, software asset reuse, and private workspaces. Together, AccuRev and JetBrains IntelliJ IDEA are ideal for complex, geographically distributed, Agile and parallel application development.

Full integration between JetBrains IntelliJ IDEA and AccuRev change package functionality enables true issue-based engineering workflows, utilizing a wide variety of available issue and defect tracking systems. Developers benefit from the ability to manage an issue-based workflow within AccuRev, directly from the JetBrains IntelliJ IDEA client.

The JetBrains IntelliJ IDEA Plug-in for AccuRev enhances everyday productivity with numerous usability features. For example, icons within JetBrains IntelliJ IDEA offer visual indicators of projects and file status. All common AccuRev searches are available from JetBrains IntelliJ IDEA so that developers, release engineers, and managers can query the AccuRev server for the latest source code changes. History data is fully integrated in the JetBrains IntelliJ IDEA environment, providing powerful access to the rich versioning functionality of AccuRev.

Features

- Out-of-the-box integration between AccuRev software and the JetBrains IntelliJ IDEA IDE
- Change packages integration between JetBrains IntelliJ IDEA and AccuRev software
- Graphical icons increase visibility of project activities
- Full access to AccuRev searches from within JetBrains IntelliJ IDE

The Advantages

- The JetBrains IntelliJ IDEA Plug-in for AccuRev provides developers transparent access to the power of AccuRev without leaving their IntelliJ IDE
- Implement a best-of-breed Application Lifecycle Management (ALM) solution by deploying AccuRev with IntelliJ IDEA
- AccuRev provides robust integration with the open JetBrains IntelliJ IDEA platform, with improved usability for developers and rich exposure of AccuRev functionality within the JetBrains IntelliJ IDEA environment.
- Full integration between JetBrains IntelliJ IDEA and AccuRev Change Packages enforces process and enables developers to interact with issue-based engineering workflow directly from JetBrains IntelliJ IDEA
