

# Deliver Software Faster

## Scrum, XP, Waterfall, Lean...

## Designed for Today's Complex Software Development

Unleash your development potential with AccuRev®

- Quickly respond to rapid release cycles
- Visualize and dynamically manage your software development process
- Collaborate efficiently with geographically distributed development teams
- Quickly adopt continuous integration and other agile processes
- Manage multiple releases in parallel with "drag and drop" ease

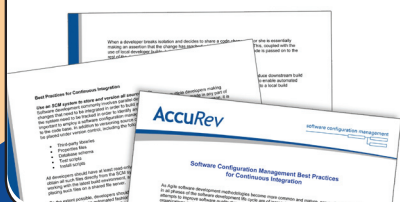

## Accelerate your Software Development Process by 30% with AccuRev

AccuRev provides best-of-breed software change and configuration management (SCCM) solutions for today's complex and changing software development environments. AccuRev takes an agile and efficient approach to managing the software release process together with code assets using any preferred development process model or multiple processes simultaneously (e.g., Scrum, Waterfall, Lean, XP, RUP). AccuRev provides out-of-the-box integrations with existing software infrastructure and tool investments including Eclipse, Visual Studio®, Atlassian JIRA®, ClearCase, Rally Enterprise, and more.

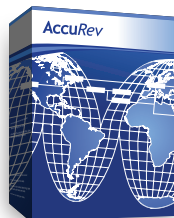

AccuRev customers build better software – some examples include SanDisk, American Airlines, Orbitz, Polycom, Thomson Financial and Lockheed Martin.
